Zennio Z50 Panel

LED touch panel with graphing, remote access and scheduling.

MDT AZI-0316.03

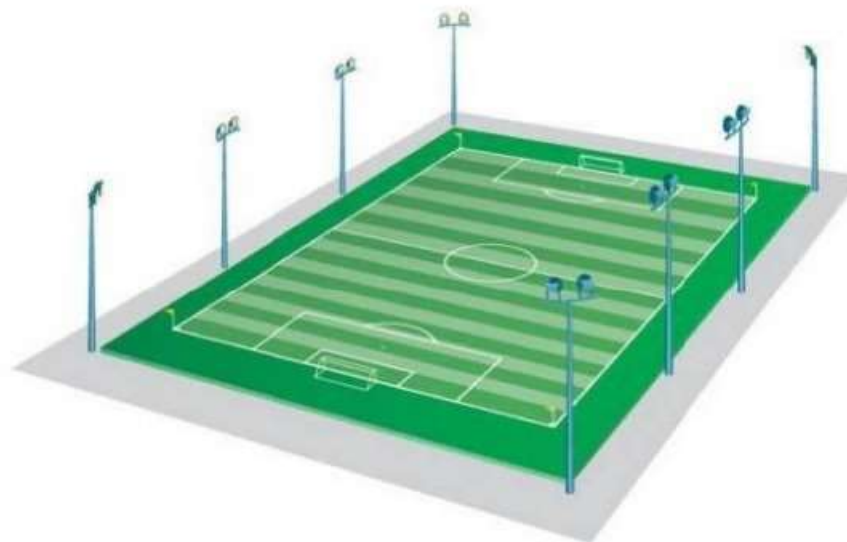

16A Switching Actuator with Active Energy Monitoring and Operating Hours.

Siemens Lux Meter

External Lux Meter with Temperature

Flood Lighting Application

DESIGN CONCEPT

MDT Actuator mounted within each Lighting column allowing switching of individual floodlights along with active energy monitoring (for Energy monitoring) and operating hours (for lamp life / warranty) calculation.
Zennio Z50 Panel used to display energy consumption, allow remote access for switching and also allow scenes (for partial pitch lighting) and scheduling.

Siemens Lux Meter used to ensure Lights aren't activated during day time.
